

College Grant Program

IntegraONE is focused on providing the latest technology to colleges and universities throughout Pennsylvania. We understand the value of creating partnerships with our clients in order to provide critical technology to both the students and the academic institutions we serve.

When choosing a college or university, students seek an educational environment that is best suited to help them achieve their individual goals, both academically and financially. We understand the challenges you face in attracting the best students, expanding the information technologies on your campus to meet everchanging needs, and helping your students succeed in the academic environment.

In order to expand on our partnership with you and help your institution meet these challenges, we created the College Grant Program. And, judging by the response we've received, it is a success.

The program is an extension of our commitment to higher education

and offers a significant benefit to our clients as a small thank you for partnering with us.

As a participant in the program, we grant back to you a percentage of your annual purchases with us. You can use these funds to assist a specific student or group of students with financial need, reward students who have achieved academic excellence, or help support a department within your organization.

The choice of the grant recipient(s) is entirely up to you.

We hope that the College Grant Program will strengthen our partnership with you and enable you to meet the many challenges you face. Together we're focused on the same goal— to provide the latest technology to students and offer them the opportunity to receive the best education possible.

FACT:

The College Grant Program was created in 1999 as a way to help one of our clients fund a new project for the hearing impaired on their campus.

From this initial concept, we expanded our efforts to make the College Grant Program available to all colleges and universities we serve.

To date, we've granted back more than \$300,000 to participating institutions.
